Deep-Sea Mining

Resource Potential, Technical and Environmental Considerations

Dr. Rahul Sharma (Editor), National Institute of Oceanography, Goa, India, Email: rsharma@nio.org

- Broadens understanding of deep seabed mining for mineral resources such as polymetallic nodules, hydrothermal sulphides and ferromanganese crusts
- Examines the environmental impacts and proposes an environmental management plan for sustainable mining
- Enables readers to gain an overview of the design and development of the technology used for mining activities under extreme environmental conditions

This comprehensive book contains contributions from specialists who provide a complete status update along with outstanding issues encompassing different topics related to deep-sea mining. Interest in exploration and exploitation of deep-sea minerals is seeing a revival due to diminishing grades and increasing costs of processing of terrestrial minerals as well as availability of several strategic metals in seabed mineral resources; it therefore becomes imperative to take stock of various issues related to deep-sea mining.

The authors are experienced scientists and engineers from around the globe developing advanced technologies for mining and metallurgical extraction as well as performing deep sea exploration for several decades. They invite readers to learn about the resource potential of different deep-sea minerals, design considerations and development of mining systems, and the potential environmental impacts of mining in international waters.

Contents

| | Title | Author |
|--|---|--|
| | Foreword | Michael Lodge, International Seabed Authority, Jamaica |
| Dee | p-sea minerals – distribution characteristics and their resource pot | ential |
| 1. | Deep-sea mining: current status and future considerations | Rahul Sharma |
| 2. | Composition, formation, and occurrence of polymetallic nodules | T. Kuhn, A. Wegorzewski, C. Rühlemann, A. Vink |
| 3. | Marine Co-rich Ferromanganese Crust Deposits: Description and Formation, Occurrences and Distribution, Estimated World-wide Resources | Peter E. Halbach, Andreas Jahn, Georgy Cherkashov |
| 4. | Seafloor Massive Sulfide deposits: distribution and prospecting. | Georgy Cherkashov |
| 5. | Submarine phosphorites: the deposits of the Chatham Rise, New Zealand, off Namibia and Baja California, Mexico : origin, exploration, mining and environmental issues | Hermann Kudrass, Ray Wood, Robin Falconer |
| 6. | Predictive mapping of the nodule abundance and mineral resource estimation in the Clarion-Clipperton Zone using artificial neural networks and classical geostatistical methods | Andreas Knobloch, Thomas Kuhn, Carsten Rühlemann, Thomas Hertwig, Karl-Otto Zeissler, Silke Noack |
| 7 | Statistical Properties of Distribution of Manganese Nodules in Indian and Pacific Oceans and Their Applications in Assessing Commonality Levels and in Exploration Planning | TRP Singh, M. Sudhakar |
| 8. | Assessment of distribution characteristics of polymetallic nodules and their implications on deep-sea mining | Rahul Sharma |
| Dee | p-sea mining technology – concepts and applications | |
| 9. | Fundamental geotechnical considerations for design of deep-sea | Tetsuo Yamazaki |
| 5. | mining systems | Tetsuo Tamazaki |
| 10. | mining systems Concepts of deep-sea mining technologies | M.A. Atmanand, G. A. Ramadass |
| 9. 10. 11. | mining systems | M.A. Atmanand, |
| 10. 11. | mining systems Concepts of deep-sea mining technologies An Application of Ocean Mining Technology | M.A. Atmanand, G. A. Ramadass |
| 10. 11. Met | mining systems Concepts of deep-sea mining technologies An Application of Ocean Mining Technology - Deep Ocean Water Utilization callurgical processing and their sustainable development | M.A. Atmanand, G. A. Ramadass Koji Otsuka, Kazuyuki Ouchi |
| 10. 11. Met | mining systems - Concepts of deep-sea mining technologies An Application of Ocean Mining Technology - Deep Ocean Water Utilization callurgical processing and their sustainable development Metallurgical Processing of Polymetallic Ocean Nodules | M.A. Atmanand, G. A. Ramadass |
| 10. 11. | mining systems Concepts of deep-sea mining technologies An Application of Ocean Mining Technology - Deep Ocean Water Utilization callurgical processing and their sustainable development | M.A. Atmanand, G. A. Ramadass Koji Otsuka, Kazuyuki Ouchi R.P Das, S. Anand |
| 10. 11. Met 12 13. 14 | mining systems Concepts of deep-sea mining technologies An Application of Ocean Mining Technology - Deep Ocean Water Utilization callurgical processing and their sustainable development Metallurgical Processing of Polymetallic Ocean Nodules Sustainable processing of deep-sea polymetallic nodules Sustainable Development and its Application to Mine Tailings of Deep | M.A. Atmanand, G. A. Ramadass Koji Otsuka, Kazuyuki Ouchi R.P Das, S. Anand P.K. Sen |
| 10. 11. Met 12 13. 14 Env | mining systems Concepts of deep-sea mining technologies An Application of Ocean Mining Technology - Deep Ocean Water Utilization callurgical processing and their sustainable development Metallurgical Processing of Polymetallic Ocean Nodules Sustainable processing of deep-sea polymetallic nodules Sustainable Development and its Application to Mine Tailings of Deep Sea Minerals ironmental concerns of impact of deep-sea mining Recent Developments in Environmental Impact Assessment with | M.A. Atmanand, G.
